Topping Certification Exam Prep, Test Dumps Materials - ActualTestsIT

**Exam** : **OG0-081**

**Title** : TOGAF 8 Certification for  
Practitioners

**Vendor** : The Open Group

**Version** : DEMO

**NO.1** Which of the following is not included in a Requirements Impact Statement?

- A. all of these are included
- B. recommendations on managing requirements
- C. phases to lead on prioritization
- D. stakeholder prioritization
- E. results of phase investigations and revised priorities

**Answer:** A

**NO.2** Which of the following items would not normally be included in a Statement of Architecture Work?

- A. Project plan and schedule
- B. All of these are included
- C. Acceptance criteria and procedures
- D. Architecture Vision
- E. Signature approvals

**Answer:** B

**NO.3** In the event that an issue is not resolved through the compliance and dispensation processes, the governing board could utilize \_\_\_\_.

- A. architecture tradeoff analysis
- B. external referees
- C. impact analysis
- D. dispute resolution
- E. binding arbitration

**Answer:** D

**NO.4** Which of the following is least appropriate for inclusion in a TOGAF Data Architecture?

- A. field level integrity constraints
- B. CRUD Matrix
- C. entity relationship diagram
- D. enterprise level data entities
- E. logical schema

**Answer:** A

**NO.5** In the TOGAF Foundation Architecture, the \_\_\_\_\_ is the location where architecture building blocks are stored.

- A. Architecture Repository
- B. Architecture Governance Repository
- C. Solutions Continuum
- D. Architecture Continuum
- E. Standards Information Base

**Answer:** D

**NO.6** Upon completion of the Technology Architecture in Phase D, a \_\_\_\_ is used to compare the baseline and target architectures in terms of function.

- A. business strategy assessment
- B. architecture audit
- C. requirements analysis
- D. impact analysis
- E. gap analysis

**Answer:** E

**NO.7** In the conceptual TOGAF Governance Framework process, content and context are kept separate. This \_\_\_\_ allows the introduction of new governance material without unduly impacting processes.

- A. structured governance model
- B. process flow control mechanism
- C. configuration management method
- D. content-agnostic approach
- E. context neutral policy

**Answer:** D

**NO.8** Which of these is a trigger for initiating a new architecture cycle?

- A. All of these
- B. Business Innovations
- C. New Technologies
- D. Technology withdrawal
- E. New strategic initiative

**Answer:** A

**NO.9** A/an \_\_\_\_ is used to report on the status of a given requirement or set of requirements.

- A. business scenario
- B. architecture tradeoff analysis
- C. gap analysis
- D. architecture compliance review
- E. requirements impact analysis

**Answer:** E

**NO.10** In the Architecture Vision phase, \_\_\_\_ are useful for discovering and documenting business requirements.

- A. Market segmentation studies
- B. UML diagrams
- C. Delphi studies
- D. Business Scenarios
- E. Five forces analyses

**Answer:** D

**NO.11** In TOGAF, what level of governance is responsible for allocating IT resources to business units?

- A. implementation governance
- B. corporate governance
- C. technology governance
- D. IT governance
- E. architecture governance

**Answer:** D

**NO.12** The implementation governance phase of the TOGAF ADM is focused on \_\_\_\_\_.

- A. compliance to the architecture
- B. managing service level agreements with business units
- C. on-going change management
- D. overall IT Governance
- E. linkage to Corporate Governance policies

**Answer:** A

**NO.13** Which of the following is a key criteria for selecting architecture principles?

- A. The principle promotes alignment of IT strategies with business strategies and visions.
- B. The principle is popular with IT management.
- C. The principle assures compliance by the business units.
- D. The principle assures uniform compliance to IT mandates.
- E. The principle provides a high degree of control to IT management.

**Answer:** A

**NO.14** Who is involved in developing architecture principles?

- A. Chief architect
- B. Governing board
- C. CIO/CTO
- D. All of these actors are involved
- E. Business stakeholders

**Answer:** D

**NO.15** According to TOGAF, \_\_\_\_\_ provides the framework and structure that links IT resources and information to enterprise goals and strategies.

- A. implementation governance
- B. requirements management
- C. architecture governance
- D. IT governance
- E. IT strategy

**Answer:** D

**NO.16** According to TOGAF, governance is less about \_\_\_\_ and more about \_\_\_\_.

- A. transparency, ensuring compliance to the policies of the organization
- B. transparency, stewardship of financial resources
- C. overt control, guidance on the effective use of resources to achieve the organization's strategic objectives
- D. overt control, maintaining a high degree of accountability for financial expenditures
- E. transparency, fairness

**Answer:** C

**NO.17** When completing the Applications Architecture report, which of the following is used to evaluate possible changes to the Business Architecture due to the proposed Application Architecture?

- A. checkpoint review
- B. gap analysis
- C. requirements traceability
- D. trade off analysis
- E. impact analysis

**Answer:** E

**NO.18** Which of the following would not be appropriate for inclusion in the TOGAF Technical Reference Model's taxonomy of platform services?

- A. data management
- B. naming and directory
- C. audit
- D. internationalization
- E. reliability

**Answer:** E

**NO.19** If a coexistence approach is selected in the Phase E migration plan, what challenge(s) might arise?

- A. connectivity across different communications channels
- B. all of these
- C. data access between old and new systems
- D. application interoperability
- E. combining user interface across applications

**Answer:** B

**NO.20** Architecture governance should be guided by \_\_\_\_\_,

- A. architecture principles
- B. procurement policies
- C. accepted accounting practices
- D. buy lists
- E. marketing strategies

**Answer: A**

**NO.21** Which of the following statements about TOGAF Building Blocks is not true?

- A. They are a package of functionality intended to meet the business needs across the organization.
- B. Architecture Building Blocks are equivalent to software component objects or web services.
- C. They may have multiple implementations but with different, interdependent Building Blocks.
- D. They should have interfaces that provide access to their functions.
- E. They may be assembled from other building blocks.

**Answer: B**

**NO.22** In TOGAF, every architecture view has an associated \_\_\_\_ that describes it, at least implicitly.

- A. requirement
- B. architecture vision
- C. architecture model
- D. architecture building block
- E. viewpoint

**Answer: E**

**NO.23** How much detail is needed for the Application Baseline Architecture?

- A. A list of all reusable building blocks in the baseline environment.
- B. A complete functional specification of the existing systems that will be eliminated or replaced.
- C. A detailed inventory of all systems and applications operated by the business unit(s) involved in the architecture project.
- D. A fine grained analysis of the functionality of the baseline systems and applications.
- E. Sufficient detail to support description and definition of the target application architecture.

**Answer: E**

**NO.24** Which of the following is not part of the Project Establishment activity?

- A. Demonstrate how the proposed project fits into the overall IT governance framework.
- B. Gain the endorsement of corporate management.
- C. Define relevant architecture and business principles to support the project.
- D. Build support and commitment of the necessary line management.
- E. Conduct the necessary (enterprise-specific) procedures to secure enterprise-wide recognition of the project.

**Answer: C**

**NO.25** Which of the following TRM service qualities describes the ability to identify problems and take corrective action such as to repair or upgrade a component in a running system?

- A. availability
- B. serviceability
- C. extensibility
- D. usability
- E. manageability

**Answer:** B

**NO.26** Which of the following is least likely to be used in the formulation of architecture principles?

- A. business goals
- B. business principles
- C. strategic business drivers
- D. IT principles
- E. program or project Plans

**Answer:** E

**NO.27** In TOGAF, \_\_\_\_ are representations of a whole system from the perspective of a related set of concerns.

- A. architecture building blocks
- B. views
- C. solution building blocks
- D. viewpoints
- E. architecture models

**Answer:** B

**NO.28** Which of the following is not an important input to the Preliminary Phase of the TOGAF Architecture Development Method?

- A. all of these are important inputs
- B. business drivers
- C. business goals and objectives
- D. business strategies
- E. business principles

**Answer:** A

**NO.29** The four TOGAF architecture domains map to \_\_\_\_ on the Zachman framework.

- A. the system viewpoint row
- B. the business model viewpoint row
- C. all six rows
- D. the contextual viewpoint (Planner) row
- E. the top four rows

**Answer:** E

**NO.30** The TOGAF Technical Reference Model describes the mechanism by which applications interact with external entities in the \_\_\_\_.

- A. infrastructure applications
- B. communications infrastructure interface
- C. service qualities
- D. platform services
- E. applications platform interface

***Answer:*** B
